Q1. Under 3.3 Core Services (page 18) it states that the program should have single occupancy rooms. Is this mandatory for the contract, or could accommodations be made on a case by case basis for those patients who needed single occupancy rooms to be housed separately? Laurel Oaks has no single occupancy rooms and could not meet the July 1 deadline if construction is required?

R1. This program requires vendors to provide single occupancy rooms for all slots. Vendors have the option to propose for less than 40 slots based on their capacity.
