Amendment 1

Scope of Project, Section 3.0

There has been a change in the RFP from what was originally written, please review correction below:

Currently reads:

Children served in a TFC-Enhanced home must meet the same criteria with the children specified in the TFC home, but they require additional services that vary from behavioral aide services to specifically equipped rooms, or intensive treatment services from children's hospitals. They could experience severe emotional and behavior problems that may be self-harming in nature, and they may have intellectual disabilities, and may have a severe diagnosis of autism or chronic medical conditions. The State Division of Resource Management will be responsible for sending statewide notices when an Enhanced home is needed but the DHR County Offices will be responsible for selecting the home that the County thinks best meets the needs of their child. State DHR Resource Management will work with providers, and county offices to determine the rate needed for each child throughout their placement.

Note: ~~Appendix I~~ outlines services for TFC-Enhanced children at each tier level. Children placed in TFC-Enhanced without necessary written approval from State DHR, Resource Management Division will not be reimbursed.

Should read:

Note: Appendix G outlines services for TFC-Enhanced children at each tier level. Children placed in TFC-Enhanced without necessary written approval from State DHR, Resource Management Division will not be reimbursed.
